Yumi Na

Artist Introduction
Yumi Na, an MFA graduate from USC Roski School of Art and Design, is a leading figure in exploring the fusion of AI and digital media. Through her innovative digital collages, she pushes the boundaries of both art and technology, presenting AI as a creative partner rather than just a tool. Na also shares her expertise by teaching courses that integrate AI into the creative process.

Artwork Description / Artist's Note
Yumi Na's Surrealism Digital Collages evoke a calm and serene mood, employing a blend of AI and mixed digital tools to craft an ethereal, dreamlike world that feels almost tangible. The use of AI allows for the seamless fusion of reality and imagination, where outdoor and indoor landscapes intertwine, creating a sense of ambiguity. This interplay between the real and the surreal invites viewers to explore the shifting boundaries of space, while the integration of cutting-edge digital techniques enriches the visual complexity and depth of the work.
